ABOUT DEL SOL

Del Sol first splashed onto the retail scene in 1994 out of a small cart in Murray, Utah’s Fashion Place Mall and has been sticking its color-changing products where the sun shines ever since.

Based on Del Sol’s proprietary Spectrachrome® technology, formerly explored by NASA, color-changing inks and dyes are engineered for application on more than 10,000 Del Sol retail items. Much like a flower that blooms in the sun’s rays, the hidden colors found in Del Sol’s exclusive prints and products twist and unfold into vibrant color upon exposure to sunlight, then returning to their original state without sunlight.

Full of sunny optimism about business and life, Del Sol sells its color-changing shirts, hair accessories, jewelry, sunglasses, nail polish and more to cruise ship passengers, sun-loving beachgoers and resort vacationers.

Having fun in the sun has always been at the core of Del Sol’s culture. We stand for all that’s good. For sunshine. For fun in the sun. For memory-filled vacations. For laughter. For joy. We do it for young and old alike. For the smiles that it brings. We’re proud to share a little sunshine with so many people every day.

Today, Del Sol has grown to more than 100 store locations worldwide in 28 countries, is the world’s leading brand of color-changing apparel and accessories, and one of the most highly promoted merchants onboard Royal Caribbean, Carnival, Princess, Disney, Celebrity, and Norwegian Cruise Lines.

Del Sol’s special formula for color-change technology was developed from a concept originally explored by NASA. After years of research, Del Sol has made revolutionary enhancements to the color-changing technology by engineering its proprietary Spectrachrome® Crystal Dye, which is identified as the most vibrant color-change technology on the planet.

Del Sol made its color-change debut with only four basic ink colors and 10 black and white designs that were all engineered in Del Sol’s Spectrachrome® Laboratories. At first, these colors were only formulated for use on textiles. We now have hundreds of dye colors that we use in a variety of materials. Over the past 25 years, those same dye colors have been combined to make hundreds of color formulations for use in all our unique product collections. Since 1994, we’ve added thousands of products and designs to our color-change product applications and repertoire.
DEL SOL’S PROPRIETARY SPECTRACHROME® PHOTOCHROMIC TECHNOLOGY

• Spectrachrome is the name of Del Sol’s proprietary color-changing technology.
• While in their inactive state, Spectrachrome® crystals are invisible to the unaided human eye.
• When crystals are exposed to ultraviolet light (sunlight), they reveal their inherent color.
• Similar to a flower blooming once exposed to UV rays, the Spectrachrome molecules twist and unfold, resulting in the molecules expanding to several times their dormant size.
• The color-changing molecules shift into a range in the electromagnetic spectrum that’s visible to the human eye. This activity is referred to as the molecular excitation transition.
• Fastest, brightest and most vibrant color-change on the planet.

WORTH MORE THAN GOLD!

• Del Sol’s proprietary blends of its purest photochromic dyes are produced and distributed directly from its Spectrachrome® laboratories in Sandy, Utah.
• Del Sol’s proprietary colorant formulas are impossible to duplicate.
• More than 300,000 dye/ink variations have been tested to date.
• Del Sol dyes are produced to the highest possible clarity and quality.
• Del Sol maintains a state-of-the-art facility, dedicated to continual testing and refinement of its technology, offering the most versatility of any photochromic technology in the world.
• Del Sol’s color-changing print processes are unique above any other in the screen-printing industry – some shirts require up to 14 separate prints.

SPEC•TRA•CHROME
The life source of Del Sol. Living crystals that magically twist and unfold into color when irradiated by the sun’s rays.
Del Sol Emerges as One of the Top Companies for People Looking to Buy Color-Changing Polarized Sunglasses

Del Sol has emerged as one of the most sought-after companies for people looking to buy color-changing polarized sunglasses. The company has recently launched 70+ new styles of Solize sunglasses in the past eight months.

Del Sol has turned out to be one of the premier companies for all those who are looking to buy color-changing polarized sunglasses. Polarized sunglasses are essential for eye protection, and there’s been a prolific surge in popularity for these types of lenses.

“Once you try them, you’ll fall in love with them and they’ll be the last pair of sunglasses you’ll ever need,” said Shawn Corbridge, Del Sol VP of Marketing. “They come with a lifetime guarantee, and the Polarized lenses will help reduce glare from reflective surfaces, enhancing overall vision and color vibrancy.”

These sunglasses are a huge rage among those who are heading out on a vacation. They’re recommended for anyone moving to sunny beach areas and are ideal for anyone who loves to travel. Best of all, these sunglasses come with a lifetime guarantee against theft, loss and damage.

Del Sol’s products inherently lend themselves to having fun in the sun. Apart from the color-changing sunglasses, the company also offers color-changing shirts, hats, jewelry, nail polish, hair accessories and a whole lot more. These products change into bright, vibrant colors when exposed to sunlight; i.e., UV rays. Once people come indoors, they return to their original colors. With this color-changing ability, one can enjoy a wide variety of different products that all change colors with sunlight.

No doubt the company has a lot of future product prospects and applications, and they’re constantly exploring the potential that exists in this sector. The craze for such products is whopping in the market, and those who want to know more about the company can check it out here: [http://www.delsol.com/accessories/sunglasses.html](http://www.delsol.com/accessories/sunglasses.html)
DELSOL NAIL LACQUER

DID YOU KNOW...

We’ve printed more than 19 million shirts since 1994, using our all-organic Spectrachrome® inks.

We conducted thousands of different, environmentally safe tests to further expand our product development capabilities and to broaden our color-changing product applications.

182 new shirt designs were created in 2018.

22 million cruise ship passengers visited Del Sol ports-of-call in 2018; enough people to go back and forth 17 times from New York to LA if they were holding hands.

More than 7 million color-changing tote bags sold and distributed since 1994 – that’s enough tote bags to cover 185 football fields.

9,950+

10 MILLION
nail polish bottles sold since 1994.
